

Notice of Sewer Cleaning and Inspection

Dear Property Owner,

The municipal sewers in your area are scheduled for cleaning and inspection during the week of September 25th, 2017 between approximately 7:00 AM to 7:00 PM. Cleaning will be performed by Visu-Sewer, Inc. The work will take a few hours per city block.

The cleaning process uses a jet unit that utilizes water pressure to pull the dirt and debris from the sewer main. This process can cause pressure changes in the sewer attached to your home. During the work, you may hear gurgling sounds from your toilets or drains which is normal. There is a possibility that toilets on lower levels may overflow if your sewer vent is not properly installed or is clogged. As a precaution, please keep all toilet lids closed to minimize risk to your home. We make an effort to further minimize these risks by using experienced operators and state-of-the-art equipment.

Your patience and cooperation with this project is much appreciated.

If you have any problems please contact Visu-Sewer at 800-876-8478.
